Data: reconstructed operating dataset calibrated to Zorora's real patterns, not a CRM export. CAD shown for scale at 1 CAD = BDT 86 (Wise, 13 Oct 2026). Rates use rolling 3-month windows by the month leads arrived; close rate uses leads at least 30 days old; a rate with fewer than 10 behind it is not shown. Comparison columns show what each earlier report showed for the same window. 2024 is the first comparison year.
